

I understand there is a proposal to allow LPFM stations to take a priority over FM translator stations. In the San Antonio, TX area the only station that is 100% family friendly is KLOVE 91.3FM. Allowing a LPFM station to take over would eliminate this family friendly format. The effects of this could make it impossible for many of us listeners to feel comfortable with what our children are listening to. Also many people only hear the word of Christ through stations like KLOVE and this serves an important function in today's culture. I have always thought the airwaves belonged to the public and do not have a concern about allowing LPFM stations to broadcast, just not over the top of translator stations like KLOVE. I appreciate your time and consideration concerning this matter.

May God bless you in your decision.
